## AGRONOMIC BENEFITS

**Sulfur:** aids in protein and enzyme synthesis.

**Boron:** essential to new growth, pollination and reproduction. Stabilizes cell walls, which provides plant structure and integrity. Also aids in nitrogen assimilation and root nodulation formation, which enhances nitrogen uptake and utilization.

**Manganese:** aids in herbicide metabolism, chlorophyll formation and plant respiration. It is also critical to photosynthesis.

**Molybdenum:** promotes root nodulation growth and enhances nitrogen utilization.

**Zinc:** promotes root and shoot growth; helps plants withstand environmental stress.
