## 2022 BIOLOGICAL FIELD TRIAL RESULTS

📍 4 STATES

🌱 SOYBEANS

📊 42 DATA POINTS

🌿 SEED COAT

# Soyfx™

# 6:1

## RETURN ON INVESTMENT

When Positive Response Achieved

# 3.7

Bu/Acre

## ADVANTAGE

When Positive Response Achieved

“Planted soybeans treated with Soyfx, this year and averaged 94.5 bushel across a field. This was calculated off of load slips. Yield monitor had as high as 106. Very happy and have never had soybeans yield like this on my farm.”

Steve - Ripon, WI

### Notes:

Results valid as of 11/13/22. Data is subject to change with the receipt of additional trial information. Average results are given to communicate observations, though individual results may vary.
