

# RACEREADY™ WHEAT SEED TREATMENT

## PUT YOUR WHEAT ON THE FAST TRACK TO HIGHER YIELDS

RACEREADY™ Wheat seed treatment by Meristem Crop Performance™ shields your crop against harmful early-season disease and insects. With a best-in-class fungicide and insecticide package, RACEREADY Wheat delivers maximum protection through harvest - with your crop's performance and profitability in mind.

### APPLICATION, USE RATE & PACKAGING

RACEREADY™ Wheat is a premix designed for use in commercial liquid seed treatment systems. The product is available in 5-gallon cases, 15, 30 or 50 gallon poly drums, or 250-gallon totes. The application rate for the premix is 3.35 cwt or 1.675 oz per 50 lb of wheat seed. Simply connect to the slurry tank and set system to apply product at the suggested use rate.

### EFFICACY

KEY  
CONTROLS PEST:

| DISEASES  |                          |
|---|--------------------------|
| General Seed Rots   | <input type="checkbox"/> |
| Seedling Blight, Root, Foot and Crown Rot caused by Fusarium or Rhizoctonia | <input type="checkbox"/> |
| Seedling Blight, Root Rot and Damping-Off caused by Soil-Borne Pythium spp. | <input type="checkbox"/> |
| Common Bunt (Stinking Smut)   | <input type="checkbox"/> |
| Suppression of Powdery Mildew, Barley Stripe                                | <input type="checkbox"/> |
| Loose Smut  | <input type="checkbox"/> |
| Fusarium Scab   | <input type="checkbox"/> |

| INSECTS                      |                          |
|------------------------------|--------------------------|
| Suppress Wireworm            | <input type="checkbox"/> |
| Control Wireworm             | <input type="checkbox"/> |
| Aphids, Hessian Fly          | <input type="checkbox"/> |
| Common Grain Storage Insects | <input type="checkbox"/> |
| Grasshopper                  | <input type="checkbox"/> |

### ACTIVE INGREDIENTS PER CWT FUNGICIDES

|                   |         |
|-------------------|---------|
| Ipconazole 0.208# | 0.90 oz |
| Carboxin 3.34#    | 0.10 oz |
| Metalaxyl* 2.65#  |         |

### INSECTICIDE

|                  |         |
|------------------|---------|
| Imidacloprid* 5# | 0.80 oz |
|------------------|---------|

### OTHER

|                  |          |
|------------------|----------|
| Polymer/Colorant | 1.558 oz |
|------------------|----------|

\* EPA registered active ingredients

### AGRONOMIC BENEFITS

**Ipconazole + Carboxin:** a broad-spectrum, seed treatment fungicide blend for the control of a wide range of labeled diseases on listed cereals, corn, dried shelled beans and soybeans

**Metalaxyl:** a systemic fungicide used to control pythium damping off and systemic downy mildew

**Thiabendazole:** a systemic fungicide which aids in the control of many important plant diseases

**Imidacloprid:** a systemic insecticide proven to effectively protect wheat from a broad range of harmful insects

**Polymer:** designed to improve plantability, reduce dust-off of actives, and improve seed flow
